

AF Williams

This report describes the number and participation status of patients that your practice has referred to the *PRE-PARE 4 CGM* Study at the University of Colorado. It also describes overall patient referrals to the study.

If you have any questions about this report, the status of particular patients, or the *PREPARE for CGM* Study, please contact us at PREPARE4CGM@CUAnschutz.edu or (303) 724-6723.

Total Patients Referred:
Prepare 4 CGM Study

The graph below shows how your practice’s referral activity compares to other practices in your study arm that have referred any patients. Values inside the bar represent total referrals; the dotted line represents the average.

Any patients referred :
- derived from PPR database, report ID 88650

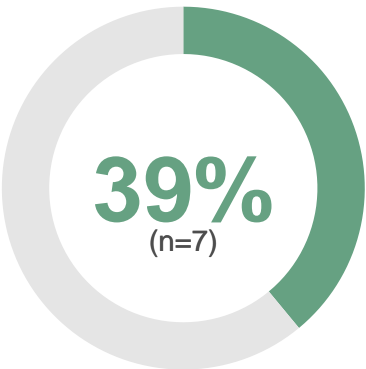

NOTE: Not all referred have been added to the patient database; in those cases, the numbers below won't add to 100% of n_referred.

Of the 18 patients your practice has referred to the study, 10 are actively participating (56%). For referred patients who are *not* participating, we’ve documented the following reasons: Declined to Participate (n=5), Duplicate or Invalid Referrals (n=1), and Other (n=2)

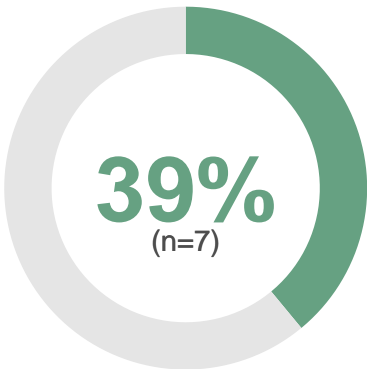

Completion Rates: Percentage of Total Referred Patients

'actively participating' defined as `eligible` does not include `NOT ELIGIBLE` and pt has no end_reason or end_date

Study staff screened patient
for study eligibility

Enrolled in PREPARE 4 CGM

count screen_complete
NB: only refers to members in patient assessment database

'Enrolled' from count of members
who have enrollment_complete ==2
